SUMMARY   *Target role: Front-end Software Developer*

Experienced Front-End Software Developer with a focus on React.JS, recognized for 4+ years of broad-based experience across the software development industry. Proven track record of writing performant, maintainable, and testable code using React, Redux, and TypeScript for high-profile web applications. Highly skilled in implementing new features and styling with EmberJS, Post CSS, and Tailwind CSS, while ensuring optimal performance and optimization through comprehensive testing. Excels at collaborating with cross-functional teams and partners to develop, test, launch, and support web applications in Agile environments.

SKILLS

Languages: JavaScript, Ruby, HTML, CSS/SASS, TypeScript
Frameworks: React.JS, NEXT.js, Ember, Ruby on Rails
Libraries: Redux, Bootstrap, Tailwind CSS, Post CSS
Tools: Git, Docker Compose, Jest/Enzyme, QUnit, RSPEC, Rubocop, GitLab, GitHub, Jira
Technologies: Node.js, RESTful APIs, Version Control Software, Remote Deployment Tools
Compliance: Accessibility/WCAG standards
Development Practices: Test-driven development, Agile environments

---

PROFESSIONAL EXPERIENCE

Fox Media   Remote
UX Developer   **2022-2023**
- Developed and optimized performant, maintainable, and testable code using React, Redux, Node.js, and TypeScript, enhancing application efficiency and the user experience.
- Led the development, testing, launching, and ongoing support of Fox Media's web applications, ensuring seamless integration and high-quality performance in collaboration with product team partners.
- Collaborated with front-end and back-end engineers to devise innovative technical solutions to complex challenges, fostering a cohesive and productive development environment.
- Implemented and maintained core features and functionalities, significantly improving the overall functionality and reliability of web applications.
- Utilized Agile methodologies to manage and deliver projects on time, enhancing team productivity and project success rates.
- Managed and resolved package dependencies and conflicts, ensuring smooth and efficient development processes.
- Played a key role in API design and integration, enhancing the interaction between front-end and back-end systems.

Scientist.com Software Services   Remote
Fullstack Software Developer   **2021-2022**
- Developed and maintained high-quality code for web applications using React, Redux, Ruby on Rails, HTML, CSS, JavaScript, and Samvera, contributing to the creation of robust and scalable solutions.
- Successfully resolved complex bug fixes in projects with preexisting code bases, improving application stability and performance.
- Collaborated across project management, development, and external teams in an Agile environment, ensuring timely and efficient project delivery.
- Elevated the user experience by implementing responsive design and optimizing front-end performance, leading to increased user satisfaction and engagement.
- Integrated RESTful APIs to facilitate seamless communication between front-end and back-end systems, enhancing overall application functionality.
- Promoted and implemented best practices in software development, including test-driven development (TDD) and continuous integration/continuous deployment (CI/CD), improving development efficiency and code quality.

Starshot Technologies   Remote
Front-end Developer   **2020**
- Completed over 100 hours of front-end coding for consumer-facing web applications, contributing to the development of high-quality, user-centric products.
- Implemented innovative new features and styling using EmberJS, Post CSS, and Tailwind CSS, enhancing the visual appeal and functionality of web applications.
- Developed and executed comprehensive application tests, ensuring optimal performance, reliability, and optimization of web applications.

EDUCATION & CERTIFICATIONS

Bachelor of Arts (BA) | University of California, Santa Barbara
Major: Global Studies; Regional Focus in Sub-Saharan Africa
Pre-medical track

Full Stack Web Development Certification | Learn Academy
Completed 500+ hours of full-stack coding in Javascript, React.js and Ruby on Rails.
Scholarship Recipient of the Edie Windsor Coding Scholarship
